

**Climate Change is Coming to Town** (J. Fred Coots, lyric source unknown)

You better not frack, you better not try,  
That's the wrong track, we're telling you why, (music say's "I'm)  
Climate change is coming to town.

We're making a list and checking it twice,  
Don't make us pissed, 'cause then we're not nice,  
Climate change is coming to town.

We know when you are fracking, polluting every lake  
We know that you've been bad, not good,  
Cut it out, for goodness sake!

Oh, you better not frack, you better not try,  
That's the wrong track, you'll make us all die,  
Climate change is coming to town.
